

# PARTEX MK10 // THERMAL TRANSFER PRINTER

## Production on site:

PARTEX New MK10 is a modern printer for printing on the PARTEX PO,PP profiles and Heat Shrink, covering all requirements for cable and core marking, terminal, cabinet and component marking.

High production speed, of up to 125mm/sec .

The MK10 has direct connection to computer via USB cable and is controlled by PARTEX software WinSign.

It prints on profile direct from the reel and cuts at required lengths, enabling very small to an extremely large number of characters per label.

## Benefits:

- Compact heavy duty design.
- Feeds, Prints and Cuts in bulk all in one.
- 300 dpi print resolution.
- Cost effective Identification system.
- Easy to use PARTEX WinSign software included.
